## About Me

I'm a second year information engineering student that have some experiences developing web apps including front end development as well as back end development. For front end development, I use React JS, HTML, and CSS for developing interactive client side of apps and for state management. For back end development, I use Node JS with Express JS as main framework to developing REST API and for error handling. For database, I use NoSQL like MongoDB as well as PostgreSQL

## Projects

**Blogging Web Applications**
It allow user to create a post and edit it
*Stack: React JS, Node JS, Express JS, MongoDB*

**Social Media Clone App**
This app basically operates like simpler version of facebook clone
*Stack: React JS, Node JS, Express JS, MongoDB*
*Design:  Vanilla CSS, Material UI*

- Users can authenticate themselves in login and register page
- User can create a post with images and content i
- User can check another user profile page
- The interaction in this app includes liking/disliking post, follow or unfollow another user.

## Background

**Gadjah Mada University (2021-2025)**
*Majoring in Information Technology in Engineering Faculty*

**Night Login (2023-current)**
